

The graph illustrates a function $f(x)$ defined on the interval $[0, 1400]$. The function is zero for $x \in [0, 200]$ and $x \in [1000, 1400]$. It takes a constant value of approximately 0.12 for $x \in (200, 1000)$. The x-axis is labeled from 0 to 1400 in increments of 200, and the y-axis is labeled from 0.00 to 0.10 in increments of 0.05.

The graph illustrates a piecewise constant function $f(x)$ over the interval $[0, 1400]$. The function is defined as follows:

- $f(x) = 0.00$ for $x \in [0, 200]$
- $f(x) = 0.15$ for $x \in (200, 1000)$
- $f(x) = 0.00$ for $x \in [1000, 1400]$

The x-axis is labeled from 0 to 1400 in increments of 200. The y-axis is labeled from 0.00 to 0.15 in increments of 0.05. The function is represented by a blue line that is at 0.00 until $x=200$, jumps to 0.15, stays at 0.15 until $x=1000$, and then drops back to 0.00.
